

KASHYAP PATEL

Full-Stack Developer & AI Engineer

kashyappatel326@gmail.com | India | github.com/kashyap-p | linkedin.com/in/kashyap-p | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and AI Engineer with 7+ years of experience designing, developing, and deploying scalable web applications and multi-agent AI systems. Expertise in React, Next.js, Node.js, TypeScript, and Three.js across the full software development lifecycle. Delivered 12+ production repositories including a 9-agent LangGraph insurance claims copilot with RAG and computer vision. Proven ability to architect REST APIs, implement JWT authentication, optimize database performance, and ship CI/CD pipelines on Vercel, Netlify, and Render. Strong problem-solving skills with a track record of reducing manual review overhead and improving application performance.

CORE COMPETENCIES

Frontend: React 19, Next.js 16 (App Router), TypeScript, JavaScript (ES6+), Three.js, React Three Fiber, Tailwind CSS, HTML5, CSS3, Framer Motion, Responsive Design, WebGL

Backend: Node.js, Express.js, REST API Design, WebSockets, Prisma ORM, Passport.js, JWT Authentication, Server-Side Rendering (SSR)

AI/ML: LangGraph, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Vision-Language Models, LLM Integration, Fraud Detection, Computer Vision

Databases: MongoDB, PostgreSQL, SQLite, MySQL, Prisma, Mongoose | **Tools & DevOps:** Git, GitHub Actions, Docker, CI/CD, Vercel, Netlify, Render, Bun, Jest

PROFESSIONAL EXPERIENCE

AI Engineer & Multi-Agent Systems Developer | Independent / Open Source | 2026 — Present | India

- Architected and deployed **ClaimSight**, a 9-agent LangGraph workflow automating insurance claims adjudication, integrating RAG, computer-vision damage assessment, and fraud detection — reducing manual review time by an estimated 60% through cited, traceable AI decisions.
- Engineered retrieval-augmented generation (RAG) pipelines to query policy documents, achieving explainable AI outputs with source citations for compliance-ready decisioning.
- Integrated vision-language models for automated photo damage severity classification, enabling real-time claim triage and prioritization.
- Developed an interactive 3D portfolio using Next.js 16, React Three Fiber, and WebGL with mouse-parallax camera interaction, improving user engagement metrics.

Full-Stack Web Developer | Independent | 2024 — 2026 | India

- Built and deployed **Wanderlust**, a full-stack MERN travel platform with JWT authentication, geolocation maps (Mapbox), Cloudinary image uploads, and CRUD operations — serving live users on Vercel with sub-2-second page loads.
- Implemented RESTful APIs with Express.js and MongoDB, supporting 50+ listing operations with optimized Mongoose queries and indexed schemas.
- Developed a real-time weather dashboard (React, Vite) consuming the Open-Meteo API with glassmorphism UI, weather-reactive backgrounds, and Canvas particle effects.
- Configured CI/CD pipelines across Vercel, Netlify, and Render, reducing deployment time from hours to automated push-to-deploy.

Frontend Developer | Independent | 2023 — 2024 | India

- Engineered a React task management application with priority-queued lists, persistent state management, and status tracking — adopted as a daily productivity tool.
- Developed 5+ responsive web applications (IMDB clone, alarm clock, tech-news, todo) in vanilla JavaScript, mastering DOM manipulation, async data fetching, and mobile-first design.
- Optimized static site assets deployed via GitHub Pages, achieving sub-2-second load times on mobile networks through lazy loading and minification.

KEY PROJECTS

ClaimSight | TypeScript, Next.js, LangGraph, RAG, Vision AI

github.com/kashyap-p/claimsight | [Live Demo](#)

- 9-agent LangGraph copilot automating insurance claims adjudication with vision-based damage assessment, RAG over policy documents, and fraud detection with cited reasoning.
- Deployed on Vercel with TypeScript end-to-end; reduced manual adjudication overhead through traceable, explainable AI decisions.

Wanderlust | Node.js, Express, MongoDB, EJS, Passport.js

github.com/kashyap-p/Wanderlust---Nodejs-Project | [Live Demo](#)

- Full-stack MERN travel listings platform with CRUD operations, JWT authentication, geolocation maps, and Cloudinary image upload integration.
- Implemented session-based auth with Passport.js, role-based access control, and review/rating system; deployed on Vercel with optimized asset delivery.

EDUCATION & ACHIEVEMENTS

Bachelor of Engineering, Computer Science | India | 2015 — 2019

- GitHub:** 12+ public repositories, 7+ years active contributor (member since 2018) | **Full-Stack Delivery:** End-to-end ownership from architecture to CI/CD on Vercel, Netlify & Render
