

KASHYAP PATEL

Full-Stack Developer

kashyappatel326@gmail.com | India | github.com/kashyap-p | linkedin.com/in/kashyap-p

PROFESSIONAL SUMMARY

Full-Stack Developer with an engineering backbone, specializing in robust, end-to-end web applications and AI-powered workflows. 7+ years building on GitHub across the full stack — from 3D interfaces (React, Three.js) to resilient backends (Node.js, Express, MongoDB) and multi-agent AI systems (LangGraph, RAG, vision models). Shipped 12+ public repositories including a 9-agent insurance claims adjudication copilot.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, Next.js (16), Three.js, React Three Fiber, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express, REST API Design, Prisma ORM, Passport.js

AI / ML: LangGraph, Multi-Agent Workflows, RAG, Vision Models, LLM Integration, Fraud Detection

Databases: MongoDB, SQLite, PostgreSQL, Prisma

Tools & DevOps: Git, GitHub, Docker, CI/CD, Vercel, Netlify, Render

EXPERIENCE

AI Engineer & Multi-Agent Systems Developer

Independent / Open Source | 2026 — Present | India

- Designed and built ClaimSight, a multi-modal multi-agent insurance claims adjudication copilot orchestrating a 9-agent LangGraph-style workflow with RAG, computer-vision damage assessment, fraud detection, and traceable cited decisions.
- Integrated vision-language models for automated damage assessment and policy-document retrieval using retrieval-augmented generation (RAG).
- Built an interactive 3D portfolio website using Next.js 16, React Three Fiber, and Three.js with real-time WebGL rendering and mouse-parallax camera interaction.

Full-Stack Web Developer

Independent | 2024 — 2026 | India

- Developed and deployed Wanderlust, a full-stack travel listings platform using Node.js, Express, and MongoDB with authentication, map integration, and image uploads (deployed on Render).
- Built a live weather dashboard with glassmorphism UI, dynamic weather-reactive backgrounds, city autocomplete, and particle effects using React, Vite, and the Open-Meteo API.
- Implemented dynamic GitHub API integration for auto-syncing repository lists with 10-minute caching and rate-limit-protected refresh.

Frontend Developer

Independent | 2023 — 2024 | India

- Built a React task management application with priority-based task lists and status tracking.
- Developed vanilla JavaScript projects including an IMDB clone and alarm clock utility, cementing component architecture and DOM manipulation fundamentals.
- Created responsive static sites (tech-news, todo app) with HTML, CSS, and JavaScript deployed via GitHub Pages.

KEY PROJECTS

ClaimSight | TypeScript, Next.js, LangGraph, RAG, Vision AI

github.com/kashyap-p/claimsight | Live: claimsight-steel.vercel.app

- Multi-agent AI copilot with 9 specialized agents in a coordinated LangGraph workflow for insurance claims adjudication with cited, traceable decisions.

Weather Tracker | React, Vite, Open-Meteo API, Canvas

github.com/kashyap-p/weather-tracker | Live: kashyap-p.github.io/weather-tracker

- Glassmorphism weather dashboard with dynamic backgrounds, city autocomplete, and ambient particle effects.

Wanderlust | Node.js, Express, MongoDB, EJS, Passport.js

github.com/kashyap-p/Wanderlust---Nodejs-Project | Live: wanderlust-nodejs-project.onrender.com

- Full-stack travel listings platform with CRUD operations, authentication, map and image upload integration.

GITHUB & ONLINE PRESENCE
